...

KRMC forced my 78 year-old friend to leave the hospital around 2 am after she had fallen, broke her wrist and fell on her face.

----- PICTURES REMOVED AFTER KRMC CALLED MY FRIEND -----

Obviously, my friend had a concussion as she didn't even call 9/11 for over three hours, not until she realized she was losing a lot of blood (didn't stop bleeding) and started to feel nauseous.

NOBODY at KRMC could have cared less how she was going to get dressed, how she would get her pain meds (they gave her only 4 pills), etc.

They were going to give her the number for a Kingman cab service after she was discharged. And they couldn't care less whether she had the money for the cab!

When I first walked into her room, I didn't even recognize my friend nor was I sure she was alive as she was sleeping. So I immediately took a few pictures and was very glad when she woke up.

A nurse came in and I told her that they should keep her for the night as she lives alone and when the nurse replied that they couldn't do that, I told her that I'm going to get the pictures to the media.

A few minutes later the security guard came in and demanded that I delete the pictures. I declined and he threatened me with calling the cops and said I was trespassing and that I would be banned from the hospital unless I was there for treatment.

I wanted to go move my truck as I was parked in the red zone by the emergency entrance and this was obviously going to take a while, but he would not allow me to leave and kept me from opening the door.

Then several cops showed up and I told them that first of all, nobody provided any written procedures regarding pictures and second, the public / media needed to be informed how KRMC abuses elderly patients and that they already killed one of my friends because they refused to help him after also discharging him instead of providing the care he deserved.

For quite a while the officers were checking the KRMC policies on a computer and then one of the officers asked to see the pictures. He told me that I was fine because I did not take pictures of staff.

KRMC is a NON PROFIT hospital.

You'd think they'd WANT the publicity so that those idiotic rules change, but since they LIED about the rules pertaining to the taking of pictures, I'm sure they wouldn't hesitate to lie about the reasons for their refusal to keep patients in need of care.

It is beyond bizarre that they force patients who obviously need care out on the street. Of course I shouldn't be surprised, since they also refused to help my friend Leo and recommended that he go to a homeless shelter when he had food poisoning (as diagnosed by KRMC). They killed my friend Leo.

When I said that one reason they should keep her is so that we could get her prescription in the morning (Kingman has no 24 hr pharmacy), a nurse said they can't keep patients over night for "convenience."

Really? Being able to get your meds is "convenience?"

She also said that state law does not allow them to give my friend more than 4 pills. SERIOUSLY???? Who are these idiots who make those stupid rules?

I don't give a shit whose fault this is, whether it's Medicare, the state or the wicked witch.

I've had ENOUGH of this elder abuse and I am VERY ANGRY!!!!
